Fight Parkinson's™
Together we can

Parkinson's Awareness Month

Today, 219,000 Australians have Parkinson's*

Parkinson's affects the nervous system. It's a progressive, degenerative condition, affecting the most important things we do as human beings – talking, eating and moving.

Parkinson's is the second most common neurological condition seen in the community.

Neurological disorders are now the leading cause of disabilities in the world and Parkinson's is among the fastest growing.

Let's change lives - and fight for a world free of Parkinson's, because together we can.

If you need to talk to someone, call our free confidential information line on: 1800 931 031
