

ParkinsonNet Australia

Research Project

Improving care for people with Parkinson's

ParkinsonNet is a model of care from the Netherlands that has been shown to improve the quality of care and outcomes for people with Parkinson's. This research project is testing the model in Australia.

We want to hear from people with Parkinson's, who live in Tasmania and Western Victoria, about your experiences of care.

The online survey will take about 20 minutes and is open until **15 March, 2026**. Completing the survey makes you eligible to win one of two \$150 vouchers.

This is your chance to help shape the future of care for people with Parkinson's in Australia.
